# CYBERchain™

## The CyberChain™ Suite

*Jaguar Freight's CyberChain suite includes four powerful modules that do more than tell you where your products are and when they'll arrive.*

They provide deep visibility and actionable intelligence. CyberChain enables you to make the process and performance improvements that lead to cost savings and competitive advantage.

The CyberChain modules—our renowned CyberTrax™ TMS, plus the ASN Portal™, Flashlight™ and POEM — can be implemented in combination or individually to accommodate your objectives, budget, and scale of business. And because we designed and built them in-house, we can customize the modules to fit the way you do business.

### **BUSINESS BENEFITS**

- + Empower data-driven score carding.
- + Improve capital allocation.
- + Enable faster time-to-market.
- + Reduce inventory costs.
- + Decrease other fixed costs.

### **TECHNICAL BENEFITS**

- + Engage our software developers to customize your deployment.
- + Enjoy the peace of mind provided by 128-bit SSL encryption.
- + Ensure near-universal systems compatibility.
- + Download reports and data in multiple formats.

[www.JaguarFreight.com](http://www.JaguarFreight.com)

## The CyberChain™ Suite

*From a strategic perspective, CyberChain can help address a number of challenges in your organization, including:*

- + Warehouse Management
- + Network Integration
- + Load and Route Optimization
- + Planning and Execution
- + Dock Appointment
- + Yard Management
- + Freight Audit and Payment
- + Fleet Operations
- + Driver and Vehicle Performance and Regulatory Compliance
- + Rate Management
- + Customs and Regulatory Compliance
- + Electronic Data and Document Exchange and Collaboration Solutions
- + E-Commerce/Order Fulfillment Solutions
- + Mobile Solutions (Domestic)
- + Supply Chain Optimization
- + GPS/Security Tracking Solutions (Domestic/International)

## CyberTrax™ Transportation Management System (TMS)

*Get a straightforward, confidential and secure route to real-time information.*

CyberTrax is the Transportation Management System (TMS) at the core of Jaguar's logistics offering. CyberTrax TMS provides deep, real-time data about your supply chain, right down to the SKU level. It's precisely the kind of real-world, real-time commercial data that can trigger key communications through the system and inform internal adjustment actions. CyberTrax TMS is transparent and available 24/7, so you can access it at any time for the latest transportation information possible.

### **BUSINESS BENEFITS**

- + Run reports to see "at a glance" information that supports tactical decisions such as all shipments from suppliers over time, and all shipments by mode, origin destination and time intervals.
- + Get real-time shipping information at any time, from any Web browser.
- + Access all your data, whenever you need it.
- + Access archived shipping information as easily as current data.

### **TECHNICAL BENEFITS**

- + Ensure near-universal systems compatibility with a password-protected, web-based system.
- + Engage Jaguar Freight software developers to customize your deployment.
- + Enjoy the peace of mind provided by 128-bit SSL encryption.
- + Download reports and data in multiple formats.
- + Provides access to all of your data so you can use it however you need it.

asnPORTAL™

## ASN Portal™ Module

*Automate your inbound supply chain management for greater efficiency.*

Innovative and intuitive, the ASN Portal deploys quickly across your supplier base and eliminates the many costly pitfalls of manual systems: redundant data entry, misrouted shipments, missed aggregation and consolidation opportunities, inefficient inventory management, and information gaps. The ASN Portal gives your planning and purchasing teams immediate visibility into what orders and quantities are available for transportation from your suppliers.

### **BUSINESS BENEFITS**

- + Consolidate, automate, and rationalize your global ASN processes.
- + Align suppliers, carriers, and all your internal and external supply chain stakeholders.
- + Improve performance, drive savings, and increase value.
- + Provide cross-functional visibility and reporting.

### **TECHNICAL BENEFITS**

- + Streamline the audit and validation of ASN data prior to transportation.
- + Reduce ASN-related communications by more than 80 percent.
- + Enable dramatic improvement in key supply chain processes.
- + Standardize data format and collection, and improve consistency and accuracy.

# FLASHlight™

## Flashlight™ Module

Gain insight into your business intelligence (BI) and key performance indicators (KPI).

The Flashlight module presents actionable intelligence via dynamic and interactive dashboards with graphical data that allow you to quickly and easily monitor KPI; historical and trending analysis, as well as supplier and carrier performance. Such strategic BI can help transform your supply chain operations from a cost center to a revenue generator, enabling you to increase your margin by decreasing your transactional costs.

### BUSINESS BENEFITS

- + Transform data into actionable intelligence.
- + Discover opportunities for cost savings and performance improvements.
- + Gain granular visibility into key cost and performance indicators.
- + Scorecard your internal and external supply chain stakeholders.
- + Define and plan logistics requirements with greater precision.
- + Understand and monitor unit costs, lead times, lane and equipment optimization, on-time performance and more.

### TECHNICAL BENEFITS

- + Provides tolerances and related exception reporting, such as high/low alarms.
- + Enable on-screen filtering and drill-down for transactional analysis.
- + Encourage a culture of continuous process improvement.
- + Define and calibrate reporting on demand.

# POEM

## POEM Module

*Generate more revenue and value from your inbound supply chain.*

Our POEM (Purchase Order Event Management) module will eliminate manual and redundant processes, enhance visibility of current practices and costs, scorecard key metrics, and help you coordinate more closely with your suppliers—all without the hassle of inefficient email communications. This collaborative platform will provide granular visibility into critical milestones and processes, helping you gain better control of your supply chain by converging planning and execution across all internal and external parties.

### **BUSINESS BENEFITS**

- + Automate supply chain event and exception management.
- + Improve capital allocation and inventory management.
- + Enable access to critical business intelligence.
- + Increase reliability, consistency, and accuracy of purchase order data.
- + Scorecard suppliers, optimize your order-to-cash cycles

### **TECHNICAL BENEFITS**

- + Move communications from individual email accounts to a centralized, transaction-based, online platform.
- + Deploy friendly interfaces for easy implementation and user onboarding.
- + Standardize, streamline and automate manual and redundant processes.
- + Automate event and exception management.

## Implementing the CyberChain Suite at Your Organization

*Jaguar can help you find ways to optimize your supply chain logistics, more conveniently, with fewer soft costs and disruptions.* Our proprietary TMS tools will push real-time, SKU-level transparency out to your front-line colleagues. They'll receive reports with actionable information, which will free you to focus on priority tasks.

“Where?”, “How much?”, “When?”, and “How can I save”? CyberChain knows.

CyberChain offers best-in-class IT solutions with lean and flexible integration schemes to help you improve your processes and performance for better cost-effectiveness and a competitive advantage.
